New Spectra Precision Laser HR150 Handheld Receiver

Interior / short-range general construction receiver with highly visible dual LEDs and built-in magnetic mount

The Spectra Precision® Laser HR150 Handheld Receiver is designed for contractors doing extensive interior construction and remodeling work. The dual-sided LED display and built-in magnetic mount make it ideal for interior leveling and aligning applications. Featuring a tough composite material housing, the HR150 can withstand a drop of up to 1.5 meters (5 feet) to a hard surface. The HR150 is the perfect entry-level receiver for smaller jobsites.

Features and Benefits

- 3-channel dual-sided LED display can be easily seen indoors or outdoors over long distances for increased accuracy and ease of use
- Built-in magnet lets you mount the receiver to ceiling grid or drywall track without the need for additional accessories
- Marking notches on both sides make it easy to mark alignments and elevations
- Strong composite housing offers protection against damage due to dropping for reduced maintenance and repair

Applications

- Interior and exterior leveling and aligning
- Soffit, curtain wall or glazing applications
- Ceiling grid and raised access floor installations

Target Groups

The HR150 Receiver is competitively priced to provide a complete product solution for interior and general construction short-range positioning, leveling, and alignment applications for light commercial construction, homebuilders, remodeling projects and specialty trade personnel.
