

The Spectra Precision® Laser HR320 is a durable laser receiver for exterior leveling applications. LCD's on the front and back display a 5 segment grade arrow that indicates grade position. A loud beeper is designed to be heard on noisy job sites. Fine and medium accuracies are selectable to meet various applications and conditions.

Features & Benefits

- Large easy-to-read LCD on front and rear makes it ideal for exterior applications
- Snap in rod clamp allows fast switching from rod-mounted to handheld applications
- Rugged waterproof housings withstands 5 ft (1.5 m) drops and protect the unit from moisture and dust
- Two on-grade sensitivities (fine and medium) let you get to grade faster in a variety of applications
- 100 db loud speaker can be easily heard on noisy job sites

Applications

- Checking and setting elevations for smaller jobsites
- Leveling forms and footers
- Estimating cuts and fills
- Ideal for decks, terraces, pools, and septic systems
